Profile

Systems Engineer with 5 years of solid experience in the software development life cycle and cloud architecture. Expert in designing scalable solutions on AWS, with technical proficiency in Java, Go, PHP, and JavaScript (React). Specialist in managing both relational and NoSQL databases. Highly adaptable professional with a continuous learning mindset, focused on process optimization through Cloud technologies.

Experience

03/2022 – 03/2023
Bogota, Colombia

NTT DATA Colombia

Junior Engineer

- Architected and deployed scalable microservices using Node.js, Go, and AWS Lambda, optimizing backend performance for core business APIs.
- Containerized application workflows with Docker, improving local development efficiency and ensuring deployment consistency across environments.
- Developed and maintained high-performance web applications using React/Angular and TypeScript, focusing on code modularity and stability.
- Implemented secure security protocols by integrating JWT for authentication and authorization across distributed systems.
- Collaborated with stakeholders in design reviews to translate business requirements into technical roadmaps, ensuring project alignment and timely delivery.
- Streamlined team workflows by establishing version control best practices (GitLab/GitHub) and implementing automated testing procedures to ensure high-quality releases.

09/2020 – 03/2022
Bogota, Colombia

Entelgy Colombia

Junior PHP Developer

- Developed and optimized web applications using PHP, implementing advanced Object-Oriented Programming (OOP) to enhance code stability and maintainability.
- Built dynamic user interfaces with React and Redux, integrating complex RESTful APIs to deliver a seamless and responsive user experience.
- Architected database layers by configuring and tuning MySQL and PostgreSQL, ensuring efficient data persistence and high-performance queries.
- Bridged the gap between design and backend by translating UI/UX mockups into functional code using HTML5, CSS3, and JavaScript.
- Led debugging and refactoring efforts for legacy PHP codebases, significantly reducing technical debt and improving system reliability.
- Managed version control workflows using Git, facilitating smooth team collaboration and code integrity across project releases.

09/2017 – 02/2020
Bogota, Colombia

RMC Producciones

Web developer

In this role, I was involved in the end-to-end development of web and mobile applications, utilizing a diverse tech stack to deliver responsive and dynamic solutions.

- **Backend Development:** Building server-side functionalities with PHP and Laravel to ensure efficient application performance.
- **Frontend Development:** Crafting user interfaces with Angular, Ionic, HTML, CSS, and JavaScript for seamless user experiences across devices.
- **Database Management:** Using MySQL for data management, ensuring optimized storage and retrieval.
- **3D Graphics:** Leveraging Blender for creating 3D assets that enhanced the visual appeal of certain projects.

Education

05/2024 – 05/2026
Brisbane City, 4000,
QLD. Australia

Advance Diploma of Information of Technology

Albright Institute of Business and Language

01/2015 – 05/2021
Bogota, Colombia

System Engineer

Corporacion Unificada Nacional

Skills

- Backend: Java, Go, PHP (Laravel), Node.js.
- Databases: MySQL, PostgreSQL, NoSQL.
- Frontend: React, Angular, TypeScript.
- Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD.

Certification

- AWS Certified Cloud Practitioner
- Spring boot & Microservices
- Diploma in Java-Based Object-Oriented Application Development

Courses

12/2025 – Present

IBM Full Stack Software Developer Professional Certificate

Coursera (In Progress)

Language

English

B2 - Upper Intermediate
